Last year, most tools needed for contest use were supplied by the Milwaukee Tool Company, and contestants were able to take them home after the contest.

If you are more comfortable using your own tools, rather than contest-supplied items, you are permitted to bring them.

If you plan to fly, please check the TSA website to ensure you are permitted to travel with certain items, like lithium batteries, large wrenches, etc. [TSA Website](#) If you choose to ship your tools (UPS or FedEx), be sure to use a trackable service.
